2001-01	Declared that storm water runoff could not enter deep gravel mine pits in the Forebay Groundwater Basin without first meeting either primary drinking water standards, or the average quality of existing groundwater downgradient of the UWCD Spreading Grounds. Percolating surface water must pass through the equivalent of 10 feet of vadose zone before reaching historic high groundwater levels. Surface exposures of groundwater, or any permanent body of water in the Forebay, must have long-term management by an agency approved by the FCGMA.	4/25/2001	5/25/2001
2000-02	Honored Arthur E. Goulet for work and input to initially create the FCGMA, and service as overseer of Ventura County water resources and Agency operations in his capacity as County Public Works Director.	3/22/2000	3/22/2000

Recommended that water providers strive to export from the Forebay or utilize Forebay groundwater whenever possible in those basins known to be in a condition of overdraft. Waived all penalties for pumping beyond annual allocations for wells inside the designated area but denied credits for wells that used such water in lieu of their annual allocation.	10/27/1999	11/27/1999

Made all penalty payments due within 30 days of postmark date credit form mailed.	10/28/1998	1/1/1999
1998-01	Declared that groundwater dewatering for construction purposes would not be regulated by the FCGMA.	2/25/1998	2/25/1998
